

The Reading of Speeches

Former Delia Residents Enjoy Picnic at Coast

By R. J. Deachen
Mr. Art Smith, M.P., made a bright suggestion in the House of Commons the other day. Not for a second would I imply that this is unusual so far as Mr. Smith is concerned. I know him years ago in Calgary. We had occasional clashes in those now distant days. He didn't agree with me nor I with him, but I admired the tightness of his reasoning, the cogency of his comments and the sparkle of his humor. Now he is in the House of Commons the other side of the Calgary West. Near the end of the Session he brought up a point which should long ago have received the light of good intentions. After every election there are many new members. Some of them are quite incapable of making an extemporaneous speech; I refer to that most abominable practice, the reading of speeches in the House of Commons.
Not infrequently great evils flow from good intentions. After every election there are many new members. Some of them are quite incapable of making an extemporaneous speech; I refer to that most abominable practice, the reading of speeches in the House of Commons.

THE WORLD OF WHEAT

By H. G. L. Strang
Director "The Crop Tending Plan"

Next Year's Outcrop Outlook

A forecast has been made by the Dominion Yield Crop Locust Laboratory at Lethbridge of the Pale Western Outcrop Outlook that will probably come in 1951.
Outcrops have done considerable damage during the present year, and it is expected that the information will be quite as bad next year (1951), which means that the 1951 outcrop will be worse and more widespread than it has been for many years out. Only one method of control has so far been discovered which is to have all summerfallow completed as near to the end of July as possible, and then for the fall not to be touched nor walked on by human beings or cattle until the middle of September. By this means a great word will be formed on the summerfallow some after August 1st, which will prevent the outcrop move from laying her eggs. It is particularly important that this method of control should be followed in any area that has suffered from the lack of rainfall during this pre-

Scarle Precipitation Report

No. 14.
Compiled from the Records of 600 Gov. estimated and Scarle Rain Gauges, records up to and including July 31st 1950.

A slight improvement has taken place during the past week in the total weighted moisture condition of the three Prairie Provinces. The total condition now stands at 81 per cent of normal, compared with 80 per cent last week and 76 per cent at this time a year ago.
The total moisture condition for Alberta now stands at 86 per cent of normal, compared with 85 per cent last week. Saskatchewan now stands at 88 per cent of normal, compared with 87 per cent last week. Manitoba now stands at 111 per cent of normal, compared with the same figure of 111 per cent last week.
Rainfall during the present growing season from April 1st to July 31st, has been 69 per cent of normal in Alberta, compared with 64 per cent last year.
It can be said that a good deal more damage to crops is feared by the Pale Western Outcrop than is generally supposed. Efforts to control the outcrop, therefore, will be well worthwhile.

last week. For Saskatchewan the seasonal rainfall has been 92 per cent of normal, compared with 90 per cent last week. Manitoba has enjoyed 120 per cent of normal, compared with 187 per cent last week.
In Alberta all Crop Districts have had less than average rainfall, with the exception of No. 7 and 10, which have had slightly better than average rains. In Saskatchewan all Crop Districts have had very slightly less than normal rain, with the exception of Crop District No. 1, which has had considerably better than average rain. In Manitoba all Crop Districts have enjoyed better than average rain, with the exception of Crop Districts 5, 12 and 14, where the rainfall has been somewhat less than normal.

Continued good recent rains in Saskatchewan and Manitoba, together with the wet weather—which was badly needed—have greatly improved prospects in these two provinces. While prospects for Alberta are less than normal, still even in that province a considerable improvement has taken place in the past three weeks.
Before she was 15 years old, Charlotte Bronte wrote 33 novels.

Donald McGill

Donald McGill, of the CPO's Montreal studios, who is currently producing the Sunday broadcast series *Starline*, on the CIBC Trans-Canada network. Mr. McGill is a musician and a flautist, specializing in the production of music programs for both English and French speaking listeners.

An outbreak of the dreaded Newcastle disease of poultry was recently reported from the Edmonton district. This is an incurable type of influenza, and is highly infectious to living.

U.S. Wheat Prices

The United States wheat price support for the 1950 crop will provide farmers in that nation with a national average of \$1.95 a bushel. Last year's rate was \$1.95 a bushel.
The price support for the 1950 crop is based on a July 1 parity of \$2.21 a bushel. The government policy provides for a support price of 90 per cent of parity. Only wheat grading No. 3 or better, or No. 4 or 5, wheat because of its test weight or because it contains of durum wheat, will be eligible for loan or purchase. The loans will be available through January, 1951, or until the end of April 30, 1951, or earlier on demand.

German-Argentina Deal

Western Germany has concluded a deal with Argentina for the purchase of 300,000 tons of wheat, 95,000 tons of rye, 110,000 tons of corn, 30,000 tons of oatmeal barley, and 35,000 tons of clover.

Temperatures which kill living crops are often only a few degrees above at which they are accustomed to living.

Chevrolet drives home the facts.

Chevrolet is FIRST... and Finest... at Lowest Cost!

FACT No. 1
FIRST... and Finest... for THRILLS AND THRIFT
Yes, Chevrolet brings you the best combination of thrills and thrills... with its improved Vaux's Champion Valve-in-Head engine. You get more thrills—thrilling action in the groove and its highway speed. You get more thrills—thanks to a new carburetor with four exhaust valves. And this carburetor Chevrolet dependability!

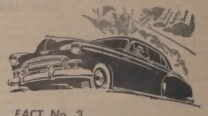

FACT No. 2
HRS. and Finest... for ALL-ROUND SAFETY AT LOWEST COST
Chevrolet is the only low-priced car offering this five-fold safety protection: (1) Curved Windshield with Panoramic Visibility, (2) Extra-strong Fisher Universal Body, (3) Safety Glass throughout, (4) Super-Safe Linked Rear Axle Action, and (5) Proved Cam-Safe Hydraulic Brakes!

Come in... get all the facts about Chevrolet... Canada's best seller... Canada's best buy... and you'll want to own a new Chevrolet!

You'll experience its extra-value in every phase of Chevrolet road-action... in its fleet and frugal Valve-in-Head performance... in its finer driving and riding ease... in the enviable view afforded by its curved windshield with Panoramic Visibility... and in its greater all-round safety-protection.

You'll know it's the best buy the minute you take the key and start the smooth-running Valve-in-Head Engine, and, incidentally, one key fits everything, from the ignition lock to the big, capacious luggage compartment. If you wish you can lock glove and luggage compartments and remove the key without locking the ignition.

Come in—today! Let Chevrolet drive home these facts to your own complete satisfaction! And you'll be quick to agree that Chevrolet is first and finest at lowest cost!

FACT No. 3
FIRST... and Finest... for STYLING AND COMFORT AT LOWEST COST

Chevrolet's exclusive Style-Seat Bodies by their extra-wide beam-riding seats—extra-generous head, leg and elbow room—extra value in every detail of styling and comfort in this long-lived and beautiful all low-priced car!

FACT No. 4
FIRST... and Finest... for DRIVING AND RIDING EASE AT LOWEST COST

Of all low-priced cars only Chevrolet offers you the unparelleled riding smoothness, road-handling and driving ease of Centre-Point Drive, with its two-tone wheels, Centre-Point Steering, Low Centre of Gravity and Centre-Point Rear Suspension all add up to a ride you'll call a dream!

A GENERAL MOTORS VALUE

Come in... Examine the Leader... Convince yourself Chevrolet's FIRST... and Finest... at Lowest Cost!

Random Notes

Reports were current over last week that Prime Minister Louis St. Laurent saw no reason to interrupt his summer holiday to attend a cabinet meeting last Wednesday to deal with the Korean crisis.

Yet while these reports were being circulated, our sister dominions of the Commonwealth—Australia and New Zealand—together with the United Kingdom, were announcing plans for the immediate reinforcement of the United Nations action in Korea by the despatch of ground troops.

It has been anticipated that Canada had little, if anything, to offer in this direction when secretary-general Trygve Lie made his appeal, now close to a month ago, but the trend of events has placed a very different aspect on Canada's position, both as a member of the United Nations and a close neighbor of the principal participant in the struggle against Communist aggression.

It would appear that what the government of Canada has to consider at the moment is whether or not it has—to say the least—a moral obligation to share in the burden now accepted as a matter of course by the other members of the Commonwealth.

The British premier, the Rt. Hon. Clement Attlee, made no mistake in his speech to the nation when he summed up by saying: "a fire has started in the East that could burn your own house down."

That same reasoning applies with equal force to the people of Canada. The price of freedom continues high. Are we prepared to pay it?

Wheat Board Member Reings Dr. T. W. Girdleway, 49, has resigned as a member of the Canadian Wheat Board, due to ill-health. In 1938 he was appointed secretary of the board, and has been a board member since 1948.

The member of parliament has abundant opportunity to train himself in the art of public speaking. The House of Commons is a centre of discussion. Views are brought forward, arguments are advanced for and against particular issues. The new member who begins by talking a small part, and then a larger part, can accomplish a great deal. Beyond that there may be long and patient training, a good deal of reading and constant study. Then, if he has natural ability and the capacity to think on his feet he may become a good working member of the House of Commons.

The constituents back home ought to know that a voiceless member in the House of Commons exerts practically no influence. Some effort should be made to elect members who can express their opinions. Our schools and colleges have done a great deal along this line. It's a work that should be encouraged. It is not necessary that we should have great orators, but it is highly advisable that our Members of Parliament should be able to think clearly and discuss with intelligence the issues which arise.

As I have previously pointed out, one of the weaknesses of the House of Commons today is the increase of members. There are now 262 members in the House. It is impossible for 262 members to take part in the debate without tending to the matter into inordinate lengths. The remedy is to cut down the members, and meanwhile exercising a great deal more care in their selection. There will always be some who fall down on the task. They suffer from emotional distress, and remain silent over a long period of years.

Just how much time has the House of Commons for debate. Suppose it sits for six months. There are five working days that, is days on which the House sits, in a week—20 in a month—a total of 120 days in the six months, or 720 hours during the session. You can knock off 120 hours of time in which there is no real discussion, so that we have 600 hours and 282 members. If we worked it out that way the average member would have about 2 hours in which to plume his plumes for oratorical flight. Some members give up, for beyond this. Many never say a word—the fact is, there are too many members for effective work. There is a tremendous volume of repetitious discussion in the House.

Ringing Mountain National Park

—Described as Canada's Prairie Playgrounds
—Situated on a Plateau, 2200 Feet Above Sea Level

Ringing Mountain National Park is a prairie playground, situated on the midwestern part of Manitoba, approximately 120 miles from the border between Canada and the United States. The park contains a beautiful plateau that forms a broad undulating area, the surface of which is a fine example of the glacial erosion of the Wisconsin glaciation.

To the natural attractiveness of its delightful area of 1,100 square miles have been added recreational facilities. It is a beautiful area, the terrain makes itself felt from May 1 to November 1. The picturesque terrain has been developed into a beautiful area, the terrain makes itself felt from May 1 to November 1. The picturesque terrain has been developed into a beautiful area, the terrain makes itself felt from May 1 to November 1.

For those who regard a vacation trip without a little fishing, several lakes in the park include Clear Lake, Lake Andy, Moon Lake, and Whirlpool Lake, containing fish.

Prince Albert National Park

—Hundreds of Lakes, Long Beaches of White Sand
—Beautiful Golf Fairways, Anglers' Paradise

No other park in Canada is more dramatically diverse in its scenery and entertainment of its guests than Prince Albert National Park. This unique of beauty, situated in the anglophone center of the province, is a beautiful area, the terrain makes itself felt from May 1 to November 1. The picturesque terrain has been developed into a beautiful area, the terrain makes itself felt from May 1 to November 1.

The park is located on a height of land rising between the great waters of the Churchill system to the north and the Saskatchewan River to the south. Its many larger lakes drain north into the Hudson Bay.

These lakes are probably the park's most remarkable feature. They are scattered, ranging in size from tiny rock basins to bodies of water covering many miles. The beach is recognized as one of the finest in the world, which conform to Olympic regulations, and all visitors are welcome to enjoy the beach.

When visiting the park you cannot help but feel its history. The park is a beautiful area, the terrain makes itself felt from May 1 to November 1. The picturesque terrain has been developed into a beautiful area, the terrain makes itself felt from May 1 to November 1.

Although out of the Western Canadian, the terrain makes itself felt from May 1 to November 1. The picturesque terrain has been developed into a beautiful area, the terrain makes itself felt from May 1 to November 1. The picturesque terrain has been developed into a beautiful area, the terrain makes itself felt from May 1 to November 1.

facilities in the park. Areas available for hunting and fishing, and a children's playground, are provided near the campgrounds. To the west, visitors can find the most beautiful of the park. The terrain makes itself felt from May 1 to November 1. The picturesque terrain has been developed into a beautiful area, the terrain makes itself felt from May 1 to November 1.

For those who regard a vacation trip without a little fishing, several lakes in the park include Clear Lake, Lake Andy, Moon Lake, and Whirlpool Lake, containing fish. THE CENTRAL LONDON MEAT MARKET at Smithfield is the largest dead stock and poultry market in the world. It was built and is owned by the Corporation of the City of London, and was first opened for trade in 1800. The market is really a series of great halls covering about 10 acres on the edge of what was once the ancient city, and is linked by roads, rivers and rail with every part of Britain and the world. The shop frontages of these halls total nearly four miles with 25 miles of display rails. Through the 20 entrance gates 400 four-ton lorries can be backed in at one time and unloaded within an hour. Calf shoves on the premises and adjacent roads are capable of 15,000 tons—the equivalent of 600,000 million carcasses.

A LITTLE DEER WITH A LITTLE DEER—The little deer shows no fear of Ruth Janet Ginn, two-year-old granddaughter of Mrs. Fisher Arthurs in the true sense of the word, are domesticated only with difficulty. However, as always, an occasion came along to prove the Elster Bertrand discovers track repair problems with a grouse near St. John, N.B.

FEATHERED RAILROADERS—Ruffed grouse, traditionally a wild bird in the true sense of the word, are domesticated only with difficulty. However, as always, an occasion came along to prove the Elster Bertrand discovers track repair problems with a grouse near St. John, N.B.

PEWITERS IN SEARCH OF INDULGENCE—Two hundred pilgrims stood close to the confessional waiting their turn to confess during Lenten ceremonies in honor of Our Lady of Fatima in Lisbon, Portugal. In spite of stormy weather, the Basilica has been unusually crowded with devotees from many countries anxious to receive the blessing of "Nossa Senhora de Fatima."—Central Press Canadian.

NO WORRY ABOUT PATIENTS—As long as there are ships on the North Atlantic, Dr. J. E. Labrecque won't have to worry about where his next patient is coming from as the doctor hangs his shingle on the government pilot boat, Cladette at Father's Point, Que. His job is to check the incoming passengers, to see that they have the necessary medical papers, before entering the country, and looking after any needy cases. In the above photo Dr. J. E. Labrecque, left, lounges on the rail of the government pilot tender Cladette, before moving out into the river to meet an incoming liner. With him is Dr. Henri Laurin, another sea-going medical official.
